SUMMARY

Computer Science undergraduate specializing in Artificial Intelligence and Machine Learning, skilled in Python and Java, with hands-on experience in AI, machine learning, deep learning, and full-stack web applications. Proven ability in algorithms and data structures. Seeking a Software Engineer role to leverage skills in developing innovative and efficient software solutions.

SKILLS

- **Programming:** Python, Java, SQL
- **Machine Learning:** Supervised & Unsupervised Learning, Model Evaluation
- **Core Computer Science:** Data Structures & Algorithms, Object Oriented Programming, Database Management Systems
- **Cloud Computing & Networking:** AWS (EC2, S3, IAM, VPC), TCP/IP, OSI Model
- **Web Development (Basic):** HTML, CSS, JavaScript, Flask
- **NLP:** Text Preprocessing, Document Classification, Summarization
- **Tools & Platforms:** Git, GitHub, Linux
- **Databases:** MySQL

EDUCATION

- SRISAIRAM ENGINEERING COLLEGE**, B.E in Computer Science and Engineering (AIML) 2023-Present
- CGPA: 8.7/10
- VIDYA JOTHI MATRIC HR SEC SCHOOL**, (CLASS 12) – CS Course 2023
- PERCENTAGE: 87.67% [[Certificate](#)]

EXPERIENCE

- CLOUDLOGIC TECHNOLOGIES PVT LTD** – India | AWS Cloud Fundamental Intern [[Certificate](#)] June 2025 – July 2025
- Completed a 1-month AWS cloud internship focused on cloud infrastructure and deployment practices.
 - Launched and configured 2+ EC2 instances for cloud-based application testing and deployment.
 - Configured AWS services including S3, IAM, and VPC to simulate real-world cloud environments.
 - Applied cloud security and scalability practices for enterprise-level application deployment.
 - Monitored EC2 performance and system logs using AWS CloudWatch to maintain system reliability.

- BIG-SI-BUCKS PVT LTD** – Chennai, India | AI/ML Intern [[Certificate](#)] Dec 3 – Dec 17, 2025
- Built an AI-based resume screening system using NLP to analyze 100+ resumes and extract skills, education, and experience.
 - Applied TF-IDF and Cosine Similarity algorithms to match resumes with job descriptions and generate candidate relevance scores.
 - Designed a candidate evaluation model ranking applicants based on 3 factors: skills, experience, and education.
 - Reduced manual resume screening time by automating candidate filtering using machine learning techniques.

PROJECTS

LifeDonor – ML-Based Emergency Donor Matching System

- Engineered a machine learning donor matching platform handling 100+ simulated donor requests in real time.
- Utilized the K-Nearest Neighbors (KNN) algorithm to identify optimal donors based on distance, availability, and request priority.
- Integrated Google Maps API to locate nearby eligible donors within a 10-20 km geographic radius.
- Built the backend using Python and Flask with secure authentication and encrypted data handling.
- Designed an automated notification system to instantly alert nearby donors during emergency requests.

ANGLEAI – ILLEGAL BOWLING ACTION DETECTION SYSTEM

- Implemented real-time bowling legality detection system with 95% accuracy using MediaPipe, OpenCV, and PyTorch.
- Accomplished 92% inference accuracy with <100ms latency per frame in live video processing Estimated elbow angle with 94.3% accuracy by tracking joint keypoints and trajectory
- Flagged rule violations based on ICC's 15-degree elbow extension rule using angle analysis Convinced the team to switch from TensorFlow to PyTorch for better MediaPipe integration, reducing latency by 20ms.

PUBLICATIONS

Life Donor – A Machine Learning Based Connecting Lives Together

Application No : 202541114820 A

- Developed a machine learning based donor recipient coordination system using the KNN algorithm for intelligent donor matching.
- Designed a platform integrating geolocation services and secure data handling to enable real-time emergency donor identification.
- Implemented an automated donor notification system that alerts nearby eligible donors during emergency requests to reduce response time.

ACHIEVEMENTS

AI–SDG HACKATHON 2026 – 7th Place Winner (International BUILD2GETHER Hackathon)

- Secured 7th place among 500 teams in a 24-hour international AI & SDG hackathon with over 2000 participants.
- Awarded ₹35,000 cash prize for developing an innovative solution aligned with the UN Sustainable Development Goals (SDGs).

CERTIFICATIONS

COURSERA – MACHINE LEARNING SPECIALIZATION :

- Supervised Machine Learning: Regression and Classification techniques
- Advanced Machine Learning Algorithms
- Unsupervised Learning, Recommender Systems, and Reinforcement Learning

NPTEL:

- Design and Implementation of Human-Computer Interfaces – Silver (82%).
- Python for Data Science – Elite (67%).

LEARNATHON – ICT Academy:

- Successfully completed 8 technology courses organized by ICT Academy (August – October 2024 and 2025).
